FIELD TRIP AND
MOTHER'S DAY PLANT
SALE

President's Message

We have some great speakers lined up for future meetings so I hope you invite your family and friends to attend. Our goal is to try and make things fun for everyone and educational at the same time. Please don't forget to bring donations to our meeting or drop off at Maureen Adelman's house for our Spring Sale, April 30 at the YMCA. We need plants and baskets. Also reminding everyone our field trip will be coming up April 23. Please see details in this Advisory. Our society will be paying for lunch for our members. If you have any questions or want to show off an incredible bromeliad, please bring it to our meeting for show and tell. We love to see! Please feel free to call me with any ideas you have. Your input is always welcome as we try to change things up a bit to keep things exciting.

Tina Severson

ABOUT THE SPEAKER

Dr. Jeff Block is a long-standing member of our society and former President from 1988 when we hosted the 8th Bromeliad World Conference aptly named: "Miami Magic". He'll lead an engaging conversation involving the health and wellness benefits derived from caring for plants; and discuss how and why gardeners should strive to get better outcomes "practicing the art & science of nurturing nature".

Florida is an international gateway destination for the world's plant enthusiasts.

This April meeting's discussion topics may include, but are not limited to:

- Bromeliads and pineapples in **European** history;
- How to grow **South Pacific** plants in South Florida;
- **South American** deforestation's impact on medicine development.

His residence, *Block Botanical Gardens* is a South Florida garden gem and Institutional Member of the American Public Gardens Association. The homesite is situated within an ancient oak hammock planted with mango and avocado trees over a century ago. The gardens' mission is to

sustain ornamental tropical plant specimens of extraordinarily high horticultural merit that compare favorably among the finest seen anywhere in the World.

Dr. Block achieved his bachelor's degree in chemistry/psychology (Emory '78) and Medical Doctorate (Miami '82). He is a Board-Certified Anesthesiologist; Fellowship trained in Pain Management & Addiction Medicine, and a nationally respected authority in both healthcare and natural earth sciences. He is the Founder of *Nurturing Nature Group Consultants*; providing professional services that integrate healthcare's medical with agricultural sciences that benefit public health.

BEWARE OF EMAILS

If you receive an email purportedly from the BSSF President or another officer asking you to purchase gift cards for some event or charity we support, please ignore. We have a longstanding problem with a cybercrook hijacking officer emails. We will never ask you to buy gift cards

FIELD TRIP

Saturday, April 23, 8 am

Meet at NE corner of The Falls at the Salvation Army truck to carpool.

Mounts Botanical Garden, 531 N. Military Trail, West Palm Beach. We plan to arrive about 9:30.

Lunch at 12:30, Gun Club Cafe, 4631 Gun Club Road, West Palm Beach, minutes from Mounts.

Living Colors Nursery, 3651 Griffin Rd. Hollywood.

Please bring your Fairchild membership card and a credit card for admission.

MOTHER'S DAY PLANT SALE

Grab a gift for your mother or yourself at our pre Mother's Day plant sale at the South Dade YMCA, Saturday, April 30, 8 am to 2 pm. We are sprucing up plants in painted pots and baskets for the perfect gift. We could use some plant and basket donations. If you can donate, contact Maureen Adelman, mhadelman@comcast.net or 305 255 3895.

VOLUNTEERS NEEDED FOR RAFFLE TABLE

We are in need of volunteers to supply our Raffle Table. Cut some pups from 8-10 of your plants and bring them to the meeting. If you are uncomfortable with public speaking someone else can talk about the plants if they are labelled. You receive 80% of total sales.

Contact Alex Bello 239-223-6155 or
Bellotropicals@yahoo.com

MAY MEETING

We will be having another interactive meeting in May. Dr. Karl Green, a past president and extremely knowledgeable collector, will speak on "Everything You Always Wanted to Know About Mounting Tillandsias". BSSF will be providing plants and materials for everyone in attendance to take home.

WORLD CONFERENCE

The World Conference is almost here. The BSI is looking for volunteers for almost everything. Take your pick. The volunteer sign up form is attached at the end of the newsletter. The link is BSI World Conference 2022 in Sarasota, Florida. If you would like to enter a plant, please contact our FCBS rep, Mike Michalski, for the proper forms. Any problems, please contact Patty Gonzalez.

NEW DATABASE

BSI has a new database, the Bromeliad Species Database, species only. Give it a try through the BSI website.

DEAR DR. BROM

Dear Dr. Brom,

How can I find out the name of my bromeliad?

There are lots of resources out there to help you ID your bromeliad. You could start by asking an expert but you will remember the plant name better if you do your own sleuthing. A good starting point is to go to bromeliad nursery websites. The sites list names and photos of the more common bromeliads. Some good nursery websites are:

1. Tropiflora.com – especially for tillandsia
2. Michael's Bromeliads.com
3. Bromeliad World.com
4. Bromeliad Paradise.com
5. Grants-farm.com

If you can't find it there you will need to go to some very good databases. But in order to use them properly you will need to know at least the genus of the bromeliad. Is it an aechmea, billbergia, tillandsia, etc? To help you I have included 2 flow charts on page _ to help you. The charts help you by narrowing down the 2 ways to ID a bromeliad – the leaf and the flower.

Databases:

The BSI Bromeliad Species Database. Access this from the BSI website. This database is for species only. There are no hybrids. Click on the genus and then the various species and photos appear. Like many databases, there are no photos for some listings. You can scroll through the listings until you find your plant. Some genera have only a few species such as Edmundoa (3), Ananas (3), and Goudaea (2), other genera have many species such as Aechmea (243), Dyckia (178), and Guzmania (214). These will take longer to scroll through but you will be familiarizing yourself with a lot of plants in the process.

The BSI Bromeliad Cultivar Registry. Access from the BSI website. The name is misleading. A cultivar is a variation of a species that occurs naturally and is then cultivated for that trait, such as a green plant that produces a variegated pup that is then cultivated. The cultivar registry also contains the many hybrids, which are mixes

of two different plants using the seed from one and the pollen from another. Click on the genera and the cultivars appear, including photos and an explanation of the origin of the plant. Because there are so many hybrids, the lists are quite long. Billbergia has 1298 entries, Aechmea 880. A few genera have fewer cultivars such as ananas (45) and canistrum (13). Give yourself plenty of time and try to enjoy the process.

Florapix, www.florapix.nl/tropical. This is the gallery from Utrecht University Botanic Gardens in the Netherlands. It shows flowers and plants. If you know what the flower looks like you can match it to the photos. But you still need to know the genus unless you want to go through all the genera until you find what you are looking for.

Florida Council of Bromeliad Societies, FCBS.org. has 4 databases: The Photo Index Database for everything except Neoregelias including bigenerics and cultivars; the Neoregelia Photo Index Database (4289 listings); the Natural Hybrid Database (152 entries); and the Species Database (4634 entries). If you go to the main menu for each database and click "List All" you can scroll through picture after picture. I have done this and discovered names of plants I wasn't even looking for.

Other resources:

Books – BSSF still has a library of books which are very helpful. But be advised, the names in the books will be dated and may have changed due to recent DNA research.

Encyclopedia of Bromeliads is online. The cost to utilize is 10 euros. I paid and still could not get on but will continue to try.

Go to shows and nurseries and look at tags. I was at a show in Broward County when I stumbled upon a Dyckia hybrid I had at home with no tag.

Plant Snap and other plant ID apps. Are generally unreliable but may give you the genus, almost never the species.

Whether you are looking for a particular plant or just browsing, these resources can give you hours of viewing pleasure. Sources: BiologyDictionary.com; BSI website; www.Bromeliads.info; FCBS.org; Hunker.com

BROMELIAD KEY

1.	Are the leaves with prickles (spines) on the edges?	Go to Step 2
1a.	Are the leaves without prickles (no spines) on the edge?	Go to Step 6
2.	Are the leaves very succulent and taper to a point?	Think <i>Dyckia</i> or <i>Hechtia</i>
(Hechtia are found in nature above the equator and Dyckia below)		
2a.	Are the leaves in a stiff loose star-shape arrangement?	Think <i>Cryptanthus</i>
2b.	Are the leaves green looking?	Go to Step 3
2c.	Are the leaves grey looking with extra long teeth?	Think <i>Puya</i>
3.	Are the leaves like grass?	Think <i>Pitcairnia</i>
3a.	Are the leaves strap-like?	Go to Step 4
4.	Are the flowers on a stalk (scape)?	Go to Step 5
4a.	Are the flowers low down in a rosette of leaves?	Think <i>Neoregelia</i>
4b.	Are the flowers on a short pedestal with a star shape?	Think <i>Nidularium</i>
5.	Is the inflorescence erect?	Think <i>Aechmea</i>
5a.	Is the inflorescence nodding with few leaves in a tube shape?	Think <i>Billbergia</i>
6.	Are the leaves grey?	Think <i>Tillandsia</i>
6a.	Are the leaves green?	Go to step 7
7.	Are the leaves with lengthwise reddish lines underneath?	Think <i>Guzmania</i>
7a.	Are the leaves totally green or with patterns?	Think <i>Vriesea</i>

In Case You Missed It

By Leonard Goldstein

The topic of our March general meeting was creativity—specifically the ins and outs of devising artistic arrangements. And three of our most experienced and successful plant artists shared their views on what is probably the most challenging—and often mysterious—category of competition in our shows.

THE INSTRUCTORS

First up was Barbara Partagas, a transplanted Midwesterner who saw the light as a college student and relocated to Miami. Once bitten by the bromeliad bug, she started submitting entries to the competition at our annual shows. Barbara has been a prize-winner several times over and, in fact, took home the sweepstakes award on one occasion. Her yard is a wonderland of well-grown bromeliads. She addressed meeting attendees about the subject of decorative containers, dispensing valuable tips about the likes and dislikes of show judges.

Following Barbara was the one-two punch of Sandy Roth and Chieng Manlee, who teamed to speak about and demonstrate methods and materials for creating artistic arrangements of bromeliads on driftwood. Sandy is a rare Miami native who has spent the past few decades turning her yard

into a harmonious combination of colors and textures. In her years as a BSSF member, she has entered a slew of imaginative designs in the artistic arrangement category.

Chieng, on the other hand, took a much more circuitous route to Miami. Born in Canton, China, and raised in Peru, he came to this community to pursue a master's degree in mathematics and physics at the University of Miami. A disciple of Ikebana master Naito Nishikawa, Chieng has taken advanced classes in Kyoto, Japan, in Ikebana, as well as Zen and Japanese gardens. In combining the worlds of Ikebana and bromeliads, his guiding principle has been, "The simpler the better."

THE STUDENTS

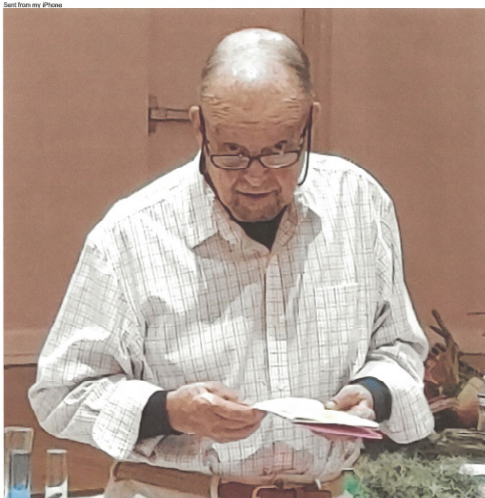

The presentation was interactive, so members who wished to try their hand at design with bromeliads brought small plants, glue, and driftwood. At the same time, Sandy and Chieng worked on their own creations. In this regard, a picture is truly worth a thousand words, so enjoy the sights of our March meeting program.

SILENT AUCTION AND MEMBER PLANT SALE RULES

When we have a speaker bringing plants, we will only allow 4 plants for silent auction in order to give our speakers who travel here and pack up their plants a fair chance to sell their plants. If you would like to sell a plant at the silent auction you will need to contact Rene Izquierdo (rcizquierdo@bellsouth.net) or 305 282 9333 and he will let you know if there is an opening for your plants. You will be paid 80% of the sale price and BSSF will receive 20%.

We will likewise defer to our speakers for member plant sales when we have a speaker bringing plants. You will again be paid 80% of the sales price. To participate in member plant sales, please contact Alex Bello (bellotropicals@yahoo.com) or 239 223 6155 to schedule your sale so that we are not overrun with plants.

We appreciate your cooperation so that there will be no hard feelings if members bring plants and are turned away because we have a speaker who brought plants to sell.

SILENT AUCTION: Rene Izquierdo

What's Blooming- April

By Stephanie LaRusso

Over the next few warm months nearly all of your *Neoregelia* will bloom, but don't get distracted by all your pretty Neos! Many other genus also bloom this time of year including *Aechmea*, *Nudicaulis*, *Vriesea*, *Quesnelia*, and *Pitcairnia*. This month I included what may seem like a few doubles but they are in fact different. Often plants collected in the wild by different people can be labeled the same but have slightly different characteristics. While plants in cultivation are typically propagated from pups, creating virtually identical clones, in the wild things are messier. Often species evolve separate traits as they expand into different habits or as their natural habitat is altered. Additionally, cross pollination can occur between different species creating swarms of varying hybrids. All this makes matching collected plants with named species very tricky! Enjoy the photos and Keep Growing!
